Objectives of the editorial board

- The editorial board typically consists of a group of prominent people in the journal's field. Having an editorial board is very important: they act as ambassadors for journals. To some extent the quality of a journal is judged by the members and academic credentials of its editorial board.

부편집인의 역할

- Identifying new topics for commissions, and advising on direction for the journal
- giving feedback on past issues and making suggestions for both subject matter and potential authors
- Approaching potential contributors

부편집인의 역할

- Peer review; also help to identify peer reviewers and provide second opinions on papers (i.e. where there is a conflict between reviewers)
- Identify appropriate conferences for editors to attend
- Endorse the journal to authors, readers and subscribers and encourage colleagues to submit their best work.
