◆ 2001 10.

대한간학회지 7권 1호부터 7권 3호

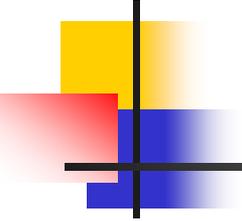

심사자료(논문 심사과정, 배포 도서관 목록, 도  
표 인용에 있어 저작권 동의서 제출받  
은 것 등 포함)와 서한 동봉하여 우송

---

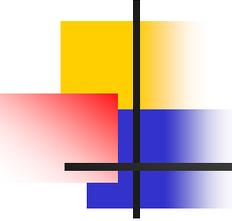

October 19, 2001

On behalf of members of the Korean Association for the Study of the Liver, I take a great pleasure to have a privilege of sending a letter to you requesting that The Korean Journal of Hepatology be considered for indexing.

---

Recent issues, Peer review processing, Rejection rate, Impact factor internally reviewed, Foreign library list and a sample of written permission for a modified figure are accompanied for your convenient review.

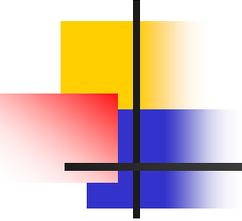

---

◆ 2001 10. – 12.

2001 NY 9-11 참사 이후 Anthrax alert로 우편물 접수 확인 없었음

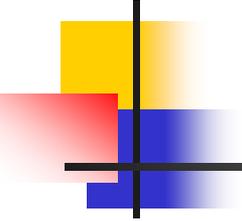

2001 12월 우편물 수신 여부를 e-mail로 문의  
심사예정(2002 6.)에 관한 답신을 2001. 12 수신

---

December 24, 2001

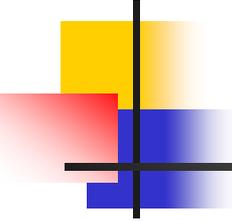

we have received a letter and several issues from you. this journal is scheduled for review in June 2002. please send us only issues 7:4 2001 and 8:1 2002 when they are published. no other material is needed. thanks.

---

June 19, 2002

On behalf of the members of Editorial Board of The Korean Journal of Hepatology, we are pleased to ask the results of your Journal Selection this June. Any advice and comment will be greatly appreciated.

---

◆ 2002 6.

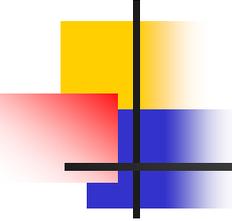

심사결과 여부 문의 후 답신을 수신

심사 결과 평점은 3.6~3.9 해당

XML파일과 Citation data base 제출을 조건으로 통과 대기

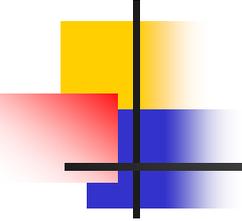

◆ Citation index 작성: 간행위 선생님께서

---

◆ XML 파일작성 작업

KoreaMed의 적극적인 협조로 8-2권에 대한  
test file을 작성

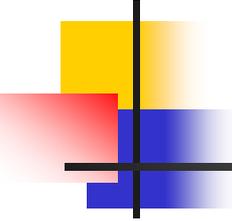

2002년 9월 8-3권 발간에 맞추어 NLM에 우송

---

2002/08/22

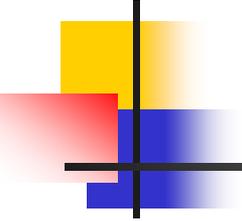

대한 간학회지 8권 3호(9월호)는 논문 전체 제목과 저자명, 영문초록 등이 아예 XML version으로 작업 완료하여 종전에 이미 완료된 XML 파일과 9월호 XML version, citation index data 등을 대한간학회지 6-1, 6-2, 6-3, 6-4, 7-1, 7-2, 7-3, 7-4, 8-1, 8-2, 8-3과 함께 9월 25일 까지 미국 National Library of Medicine에 우송완료되어야 할 것으로 판단됩니다.

---

대한간학회지 2002년 6월호의 xml파일을 보내드립니다. PubMed의 테스트를 거쳐야만 앞으로 계속 xml 파일을 보낼수 있는 ftp 계정과 패스워드를 부여받게 됩니다.

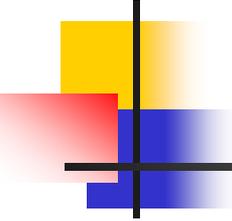

그쪽에서 인쇄본과 일일이 대조를 하기 때문에 일단 MEDLINE에서 이미 인쇄본을 갖고 있을 2002년 6월호를 샘플로 만들었습니다.

---

2002/09/28

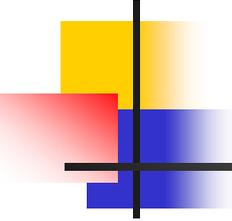

Sample xml 파일을 만들면서 느낀 것 중의 하나는 대한간학회지 cover design을 좀 바꾸어야 하는 것이 아닐까 하는 점이었습니다. 2002년 9월호를 보면 Korean Journal of Hepatology라는 글씨가 "대한간학회지"라는 글씨보다 작고 흐린 색으로 되어 있습니다. 이런 경우 사서들이 cataloging을 할 때 main title을 "대한간학회지"로 채택할 가능성이 더 높습니다.

---

2002/10/09

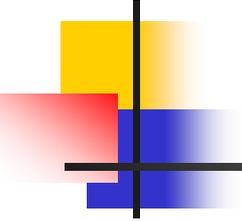

I sent you a XML file of Korean Journal of Hepatology(Volume 8-2) for your test on Sep. 26, 2002. But I haven't received any notice from you yet. Would you please let me know if you received the file and the testing process is going on?

---

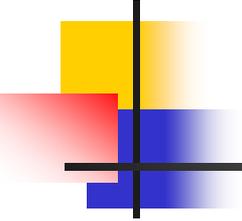

2002/10/09

Yes, we did receive the sample file and the print copy. The XML formatting was excellent. I have passed the file along to NLM's Indexing Section for the second part of the review. They compare the bibliographic data in the file to the hard copy, checking for completeness, accuracy and adherence to NLM's indexing requirements.

---

I hope to have approval for you by sometime next week. I will then obtain a private ftp account on our server for your use in submitting your future files for production. I will notify you as soon as possible.

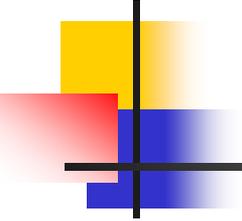

---

2002/11/19

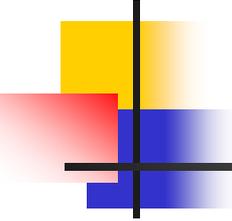

Kindly remove all square brackets from around the titles in your file.

Brackets are supplied by our computer programs where necessary for translations of titles in languages other than English.

---

Secondly, take note that the word BACKGROUND, is misspelled in several of the abstracts. Please revise accordingly and resubmit the file once more to the ftpetest directory.

---

2002/12/04

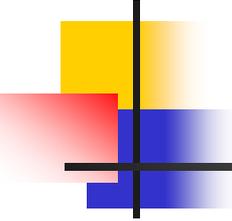

Please note the Abstracts on pgs. 132, 139,  
and 157 still begin with:

BACKGROUNDS/AIMS:

Should be BACKGROUND/AIMS:

Please make these last minor corrections;

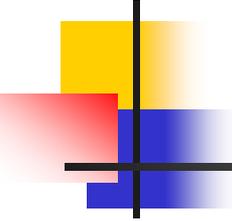

I cannot forward the file for its final review  
and approval until all revisions are complete.

---

◆ 2002 12. - 2003 1.

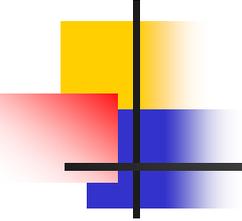

NLM에서 8-2권의 test file을 최종 승인  
8-1,2,3,4권에 대한 XML files을 작성하여 우송  
2003 1.부터 메드라인에서 검색가능하게 됨

---

2002/12/17

The Korean Journal of Hepatology has been approved for electronic submission to NLM's MEDLINE/PubMed system. We now expect to receive all issues via ftp as soon as they are available using NLM's required XML tagged format.

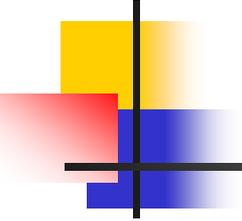

---

We have set up a private ftp account for you as follows:

Host: ftp-private.ncbi.nih.gov

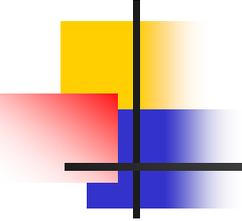

User:

Password:

---

We do not require a specific naming convention but suggest you include journal title abbreviation, volume and issue, e.g., AJPv36i12.sgml. The file name should not contain any spaces, and not exceed 32 characters.

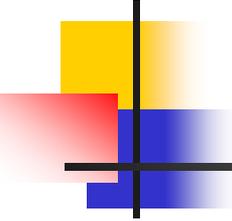

---

NLM uses the following abbreviation for this journal: Taehan Kan Hakhoe Chi

Please submit this data in the JournalTitle tag in your files.

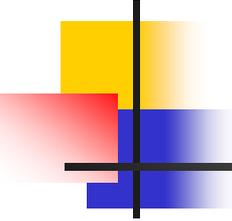

Be sure to use the correct ISSN, 1226-0479.

---

Please begin submission of XML files with issue 2002 Mar, 8(1).

We will accept XML files for issues published prior to 2002 (if they are available) and they will be added to PubMed, however, the citations published prior to 2002 will not be MeSH indexed. They will be retrievable through author and text-word searching.

---

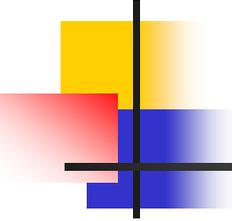

가르쳐주신 ftp주소를 이용하여 PubMed에 ftp  
했습니다.

tkhc2002v8i1.xml

tkhc2002v8i2.xml

tkhc2002v8i3.xml

이라는 이름으로 3개의 파일을 보냈습니다. 그  
3개의 파일이 archive라는 폴더 안에 넣어진것  
을 보니, PubMed에서 확인한 모양입니다.

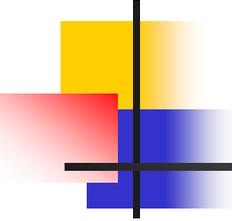

---

2002/12/24

New records added to PubMed database,  
Tue Dec 24 09:23:29 EST 2002

YJ|200209249|12499781

---

2003/01/07

This problem has been remedied – your citations display correctly now, and can be correctly retrieved by title abbreviation and ISSN. We apologize for the delay.

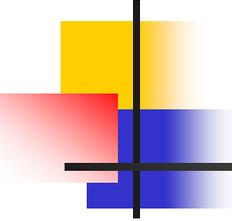

---

2003/01/06

PubMed에서 대한간학회지 2002년 발행호 모두가 검색이 됩니다.

우선 PubMed

( <http://www.ncbi.nlm.nih.gov/entrez/query.fcgi> )에 접속하신 다음, 검색식에 "8[Volume] AND 4[Issue]"라고 넣고 검색하면 "대한간학회지 2002년 4호"가 검색되는 것을 알 수 있습니다.

---

PubMed의 Journals Database

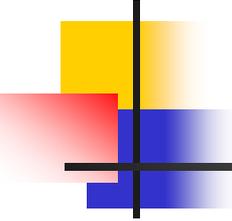

(<http://www.ncbi.nlm.nih.gov/entrez/query.fcgi?CMD=&DB=journals>) 를 검색해보면 이미 아래와 같이 display 되고 있습니다.

Taehan Kan Hakhoe chi = The Korean journal of hepatology.

pISSN: 1226-0479

MEDLINE Abbr: Taehan Kan Hakhoe Chi

NLM ID: 9607534

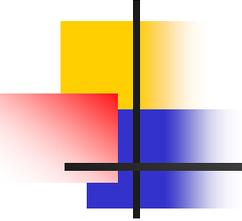

---

2003/01/09

For the documentation on the LinkOut program, please see the following page:

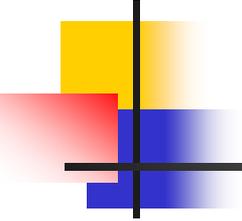

<http://www.ncbi.nlm.nih.gov:80/entrez/linkout/doc/linkoutoverview.html>

When you have prepared your provider info file and holdings files, or if you have questions, send them via email to:  
[linkout@ncbi.nlm.nih.gov](mailto:linkout@ncbi.nlm.nih.gov)

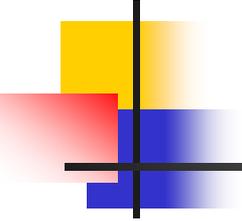

---

With regard to your plans for the cover design and title placement, we strongly recommend that you do not go forward with the changes, for several reasons.

---

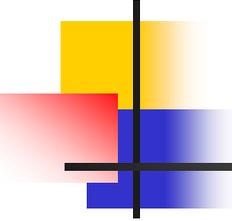

Since the articles in the journal are published in Korean, it is confusing to PubMed users to retrieve citations with an English journal title, only to find out that the articles are not published in English, but Korean.

---

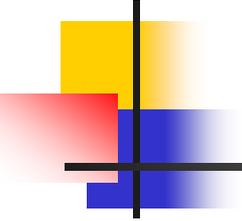

Secondly,

the only way the title will be changed is if the Korean characters do not appear on the cover at all.

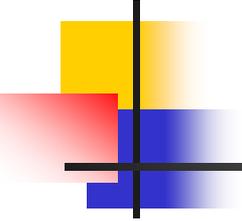

---

And finally, if you would decide to use only in English title, an entirely new bibliographic record would be created which would require you to apply for a new ISSN for the new title.

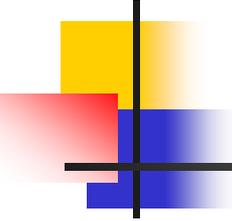

---

Once that happens, your citations will be separated in PubMed into those under the Korean title/ISSN and those under the English title/ISSN – not particularly desirable.

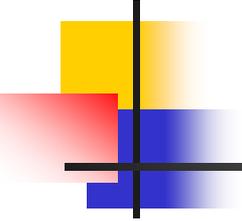

---

It's just that there are very detailed criteria that are followed internationally and within the NLM for what warrants a change to the bibliographic records.

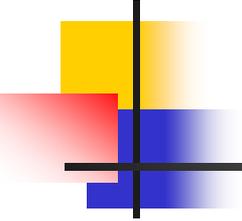

---

These serials cataloging conventions are not unique to NLM, but standardized for strong reasons relating to database retrieval and document delivery internationally.

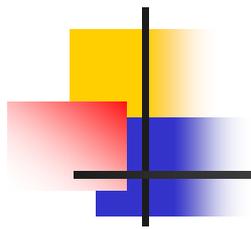

---

For this reason, PubMed can be searched using the title in either language, but the title abbreviation is based upon the vernacular language in use within the text of the articles.

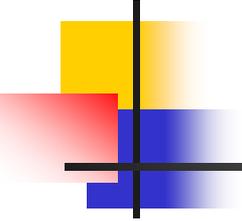

---

Please consider the above, but if you and the editorial board desire to make the change, please be aware that all Korean title words would need to be removed from the cover.
