

Ex Libris의 SFX 서비스 통한
국내의 학학술지의 세계 도서관 등록
방안

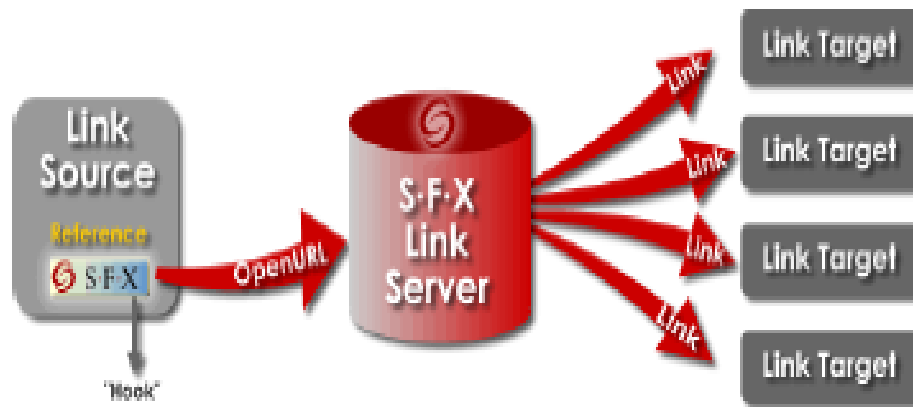

정 소 나

SFX®

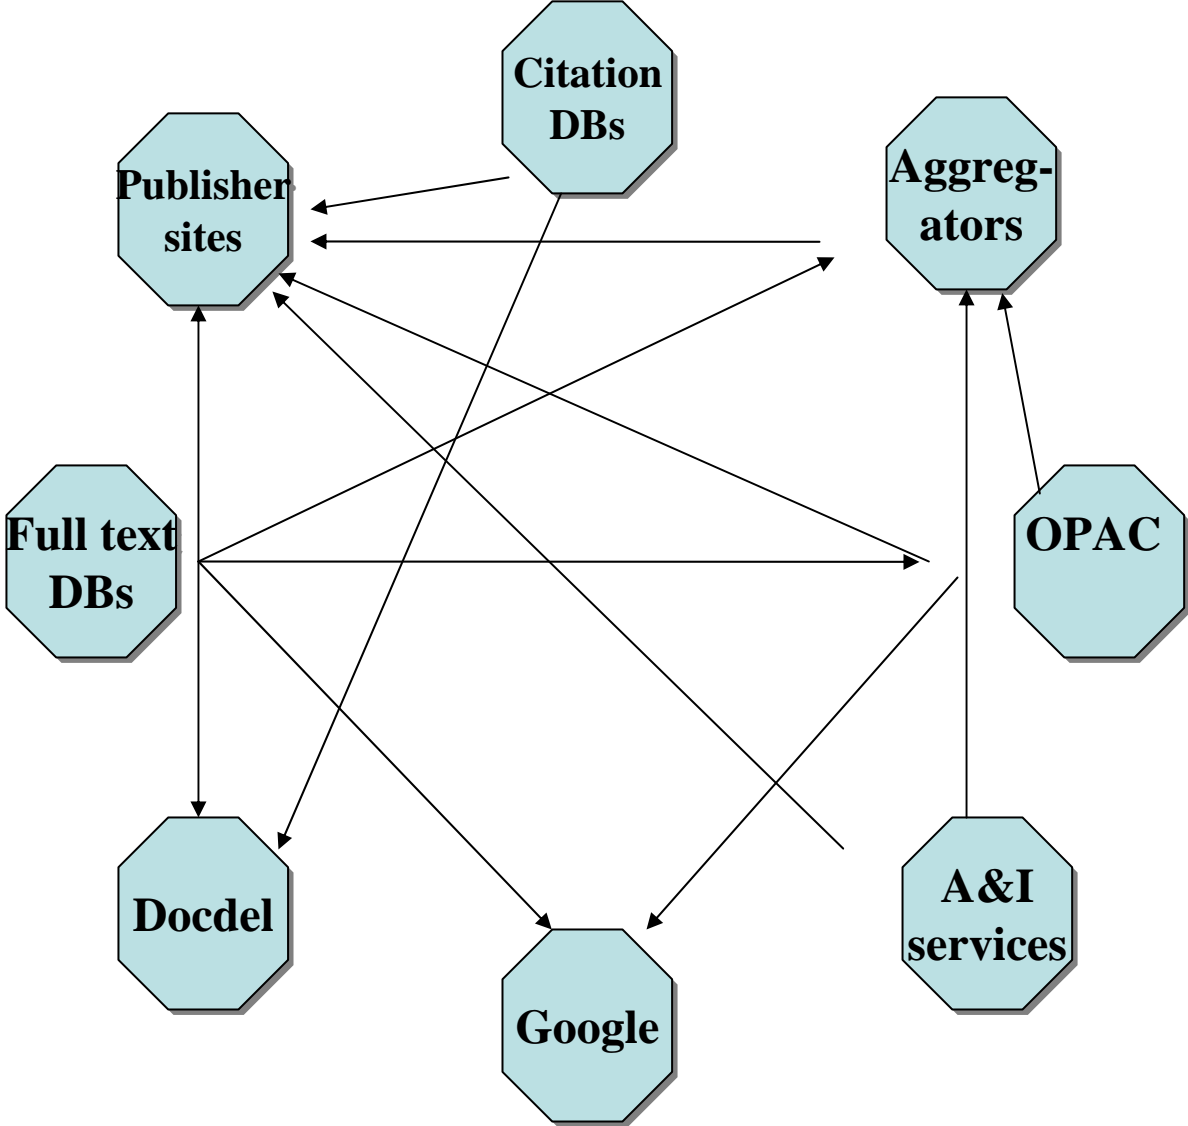

- SFX®는 Harvard, MIT, Stanford, UC-Berkeley, Johns Hopkins 등 세계적인 대학들이 사용하고 있는 Ex Libris사의 링크 서버
- 전세계적으로 1,600 여개 이상, 국내 30 여개 이상의 도서관들이 사용하고 있음
- 도서관 이용자가 자신의 검색 결과 내에서 그 결과와 관련된 자원과 서비스(예: 저널 논문이나 전자책 등의 원문 보기)로 옮겨가도록 링크를 제공하는 기술임
- 지식베이스(Knowledge Base) 관리 툴을 이용하여, **모든 정보 자원에 대해 한번만 target 링크를 설정해주면 불필요한 중복 작업들을 피할 수 있음**
- SFX 링크 서버를 운영하는 기관에 속한 이용자는 검색 결과—자관에 의해 관리되는 자원 뿐만 아니라 제 3 의 기관에 의해 원격으로 관리되는 자원—에서 도서관이 미리 정의해 둔 SFX 버튼을 볼 수 있음

- SFX 링크 서버는 CrossRef 와 같은 주요 링크링 프로젝트와 상호 연계됨

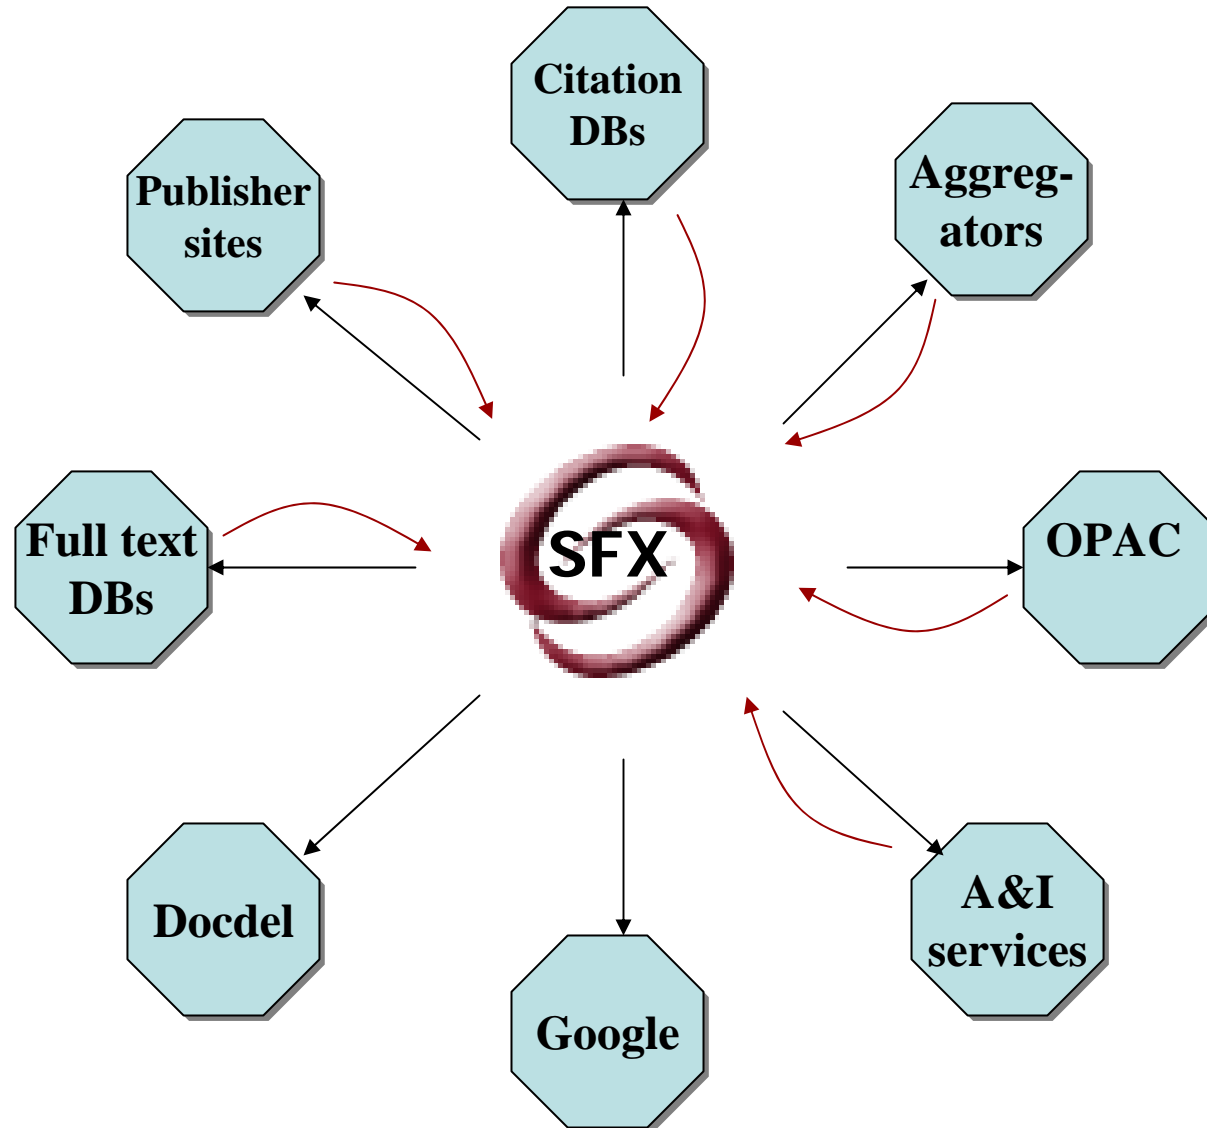

<SFX smart linking>

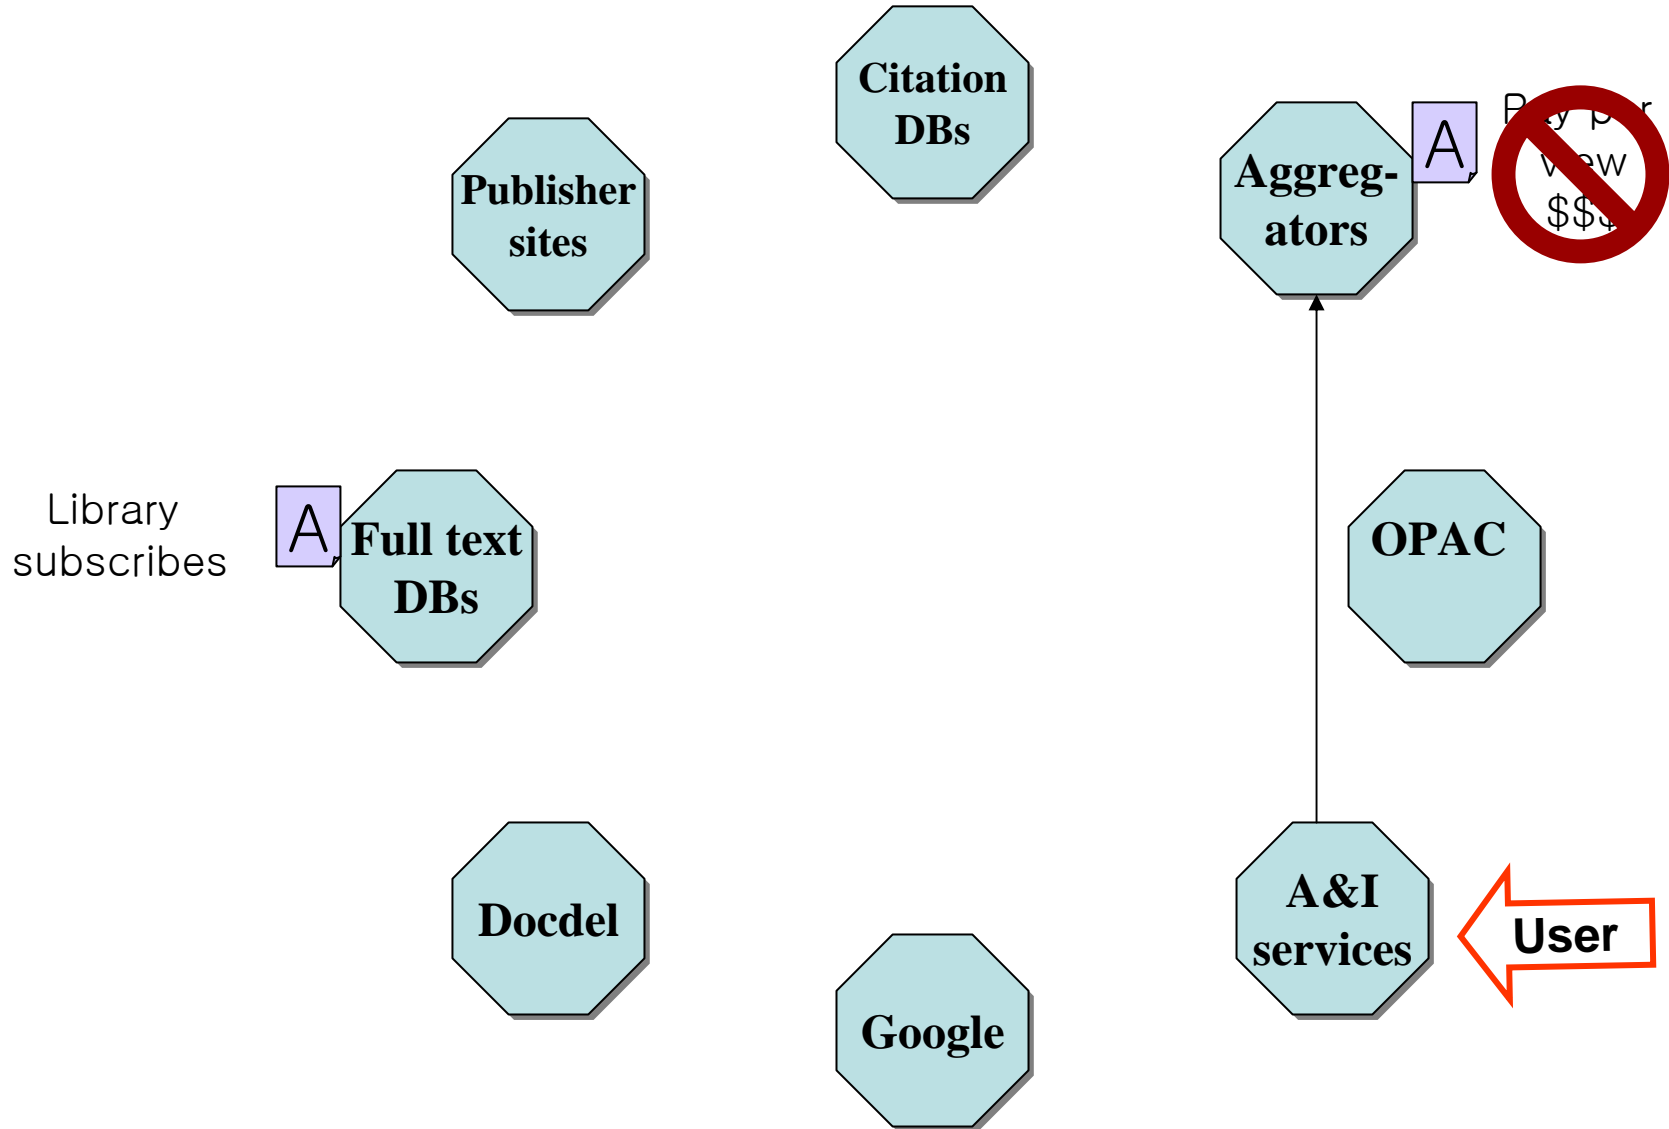

Linking can easily become unmanageable

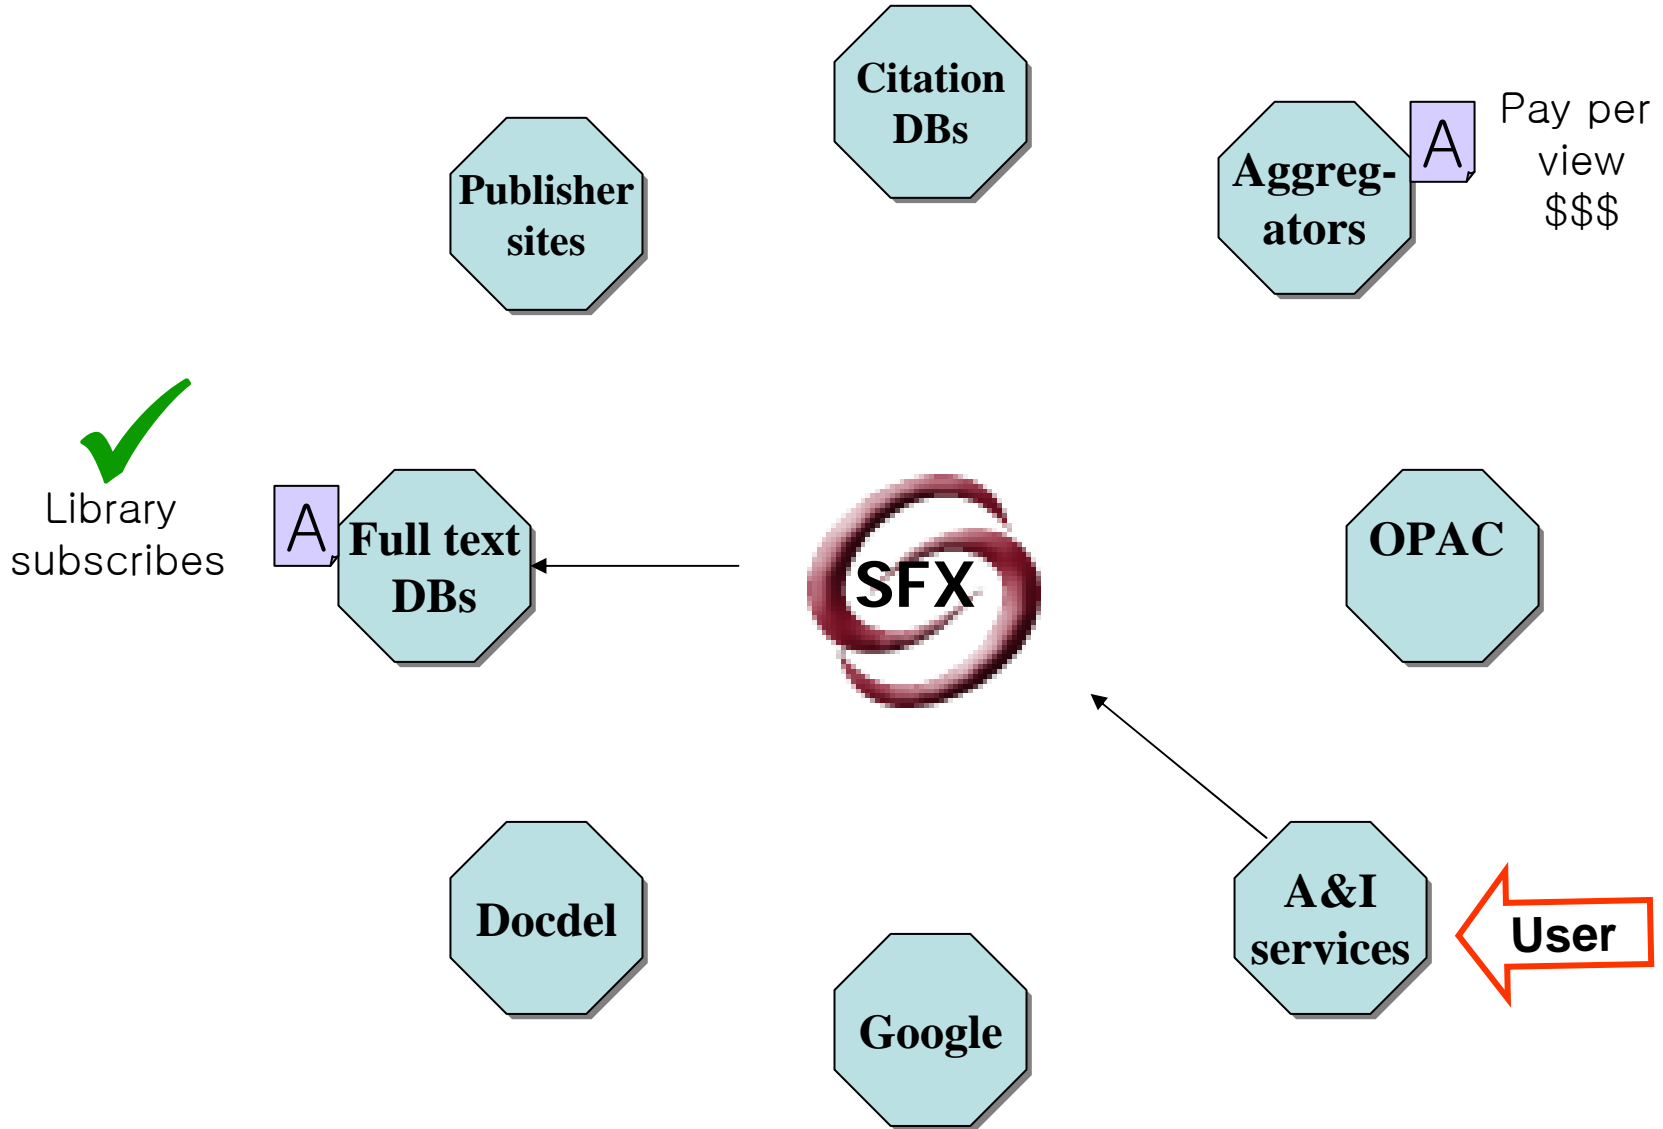

Introducing SFX allows more comprehensive linking that is easier to manage

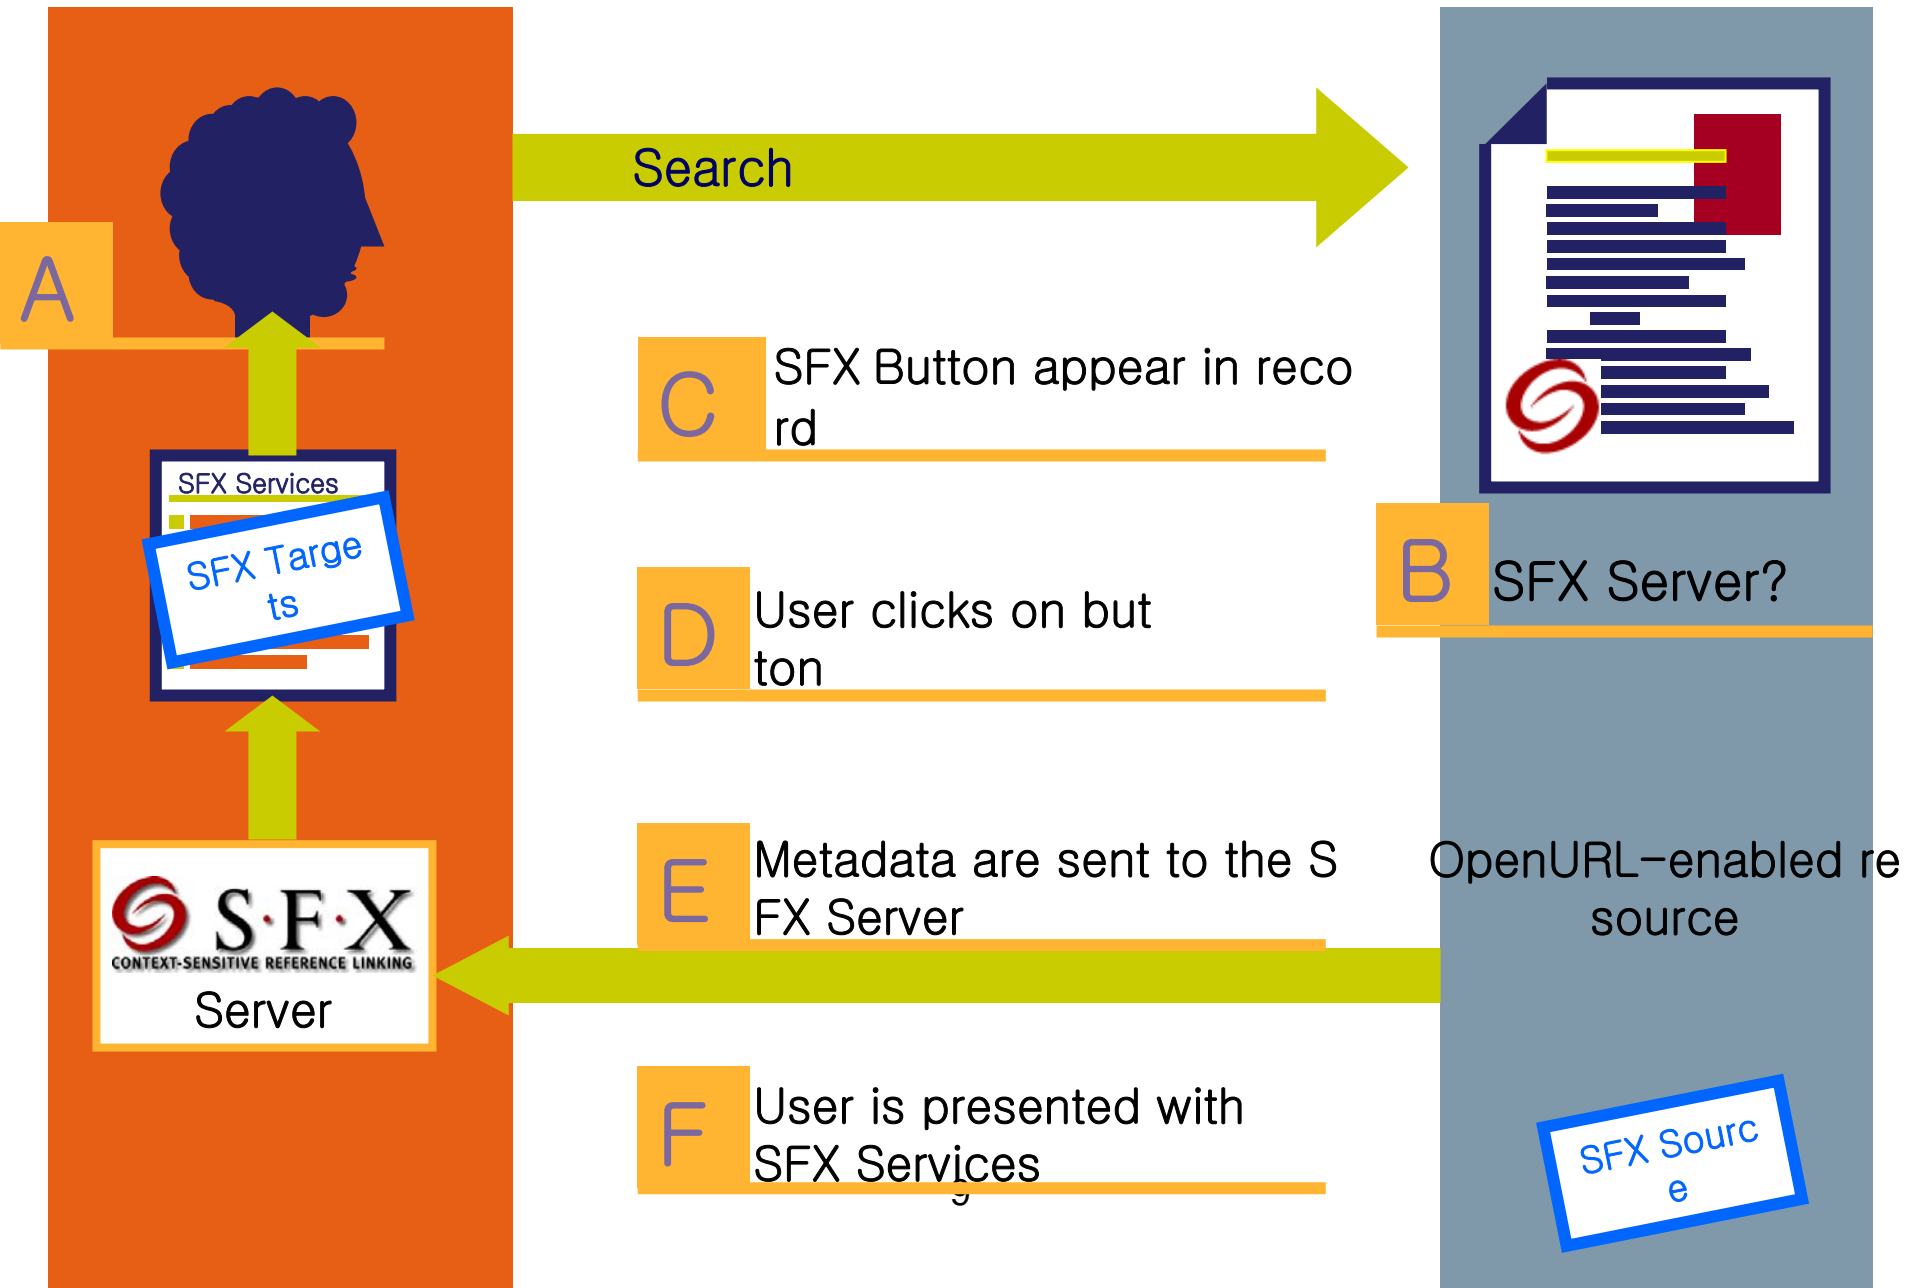

Without SFX user may access the copy that is not the appropriate copy

With SFX the institution can determine which copy is appropriate

PubMed-Yale Links

The image shows a screenshot of the PubMed website interface. The main content area displays search results for an article titled "Adventitial Cystic Disease of the Femoral Vein: a Case Report with the CT Venography." The article is from the "Korean journal of radiology" [1229-6929] Seo yr:2009 vol:10 iss:1 pg:89 -92. The authors listed are Seo JY, Chung DJ, and Kim JH. The article is from the "Korean J Radiol" journal, 2009 Jan-Feb;10(1):89-92.

The sidebar on the right contains a "My NCBI" section with a "Sign Out" link. Below that is a "Books" section. At the bottom of the sidebar, there is a "Korean J Radiol" section with a "Links" button. A red box highlights the "YALE LINKS" button in this section, with a mouse cursor pointing to it.

The main content area also features a "YALE LINKS" button at the top right. Below the article title, there are sections for "Find This Item" and "Related Library Services". The "Find This Item" section includes links to "DOAJ Directory of Open Access Journals" and "Yale University Library Catalog - ORBIS". The "Related Library Services" section includes links to "Web of Science", "Endnote, Procite, or Reference Manager", "RefWorks", and "formatted citation and URL".

At the bottom of the page, there is a "Get Help" section with links to "Ask! a Librarian", "Central Campus", and "Medical Campus".

The footer of the page reads "Yale University Library".

Decrease of *Metagonimus yokogawai*

[Lee JJ](#), [Kim HJ](#), [Kim MJ](#), [Yi Lee J](#)

Department of Parasitology and Tropical Medicine, Institute of Endemic Diseases, Seoul National University College of Medicine, Seoul, Korea

The Tamjin River which flows from the mountains to the sea has been reported to be a highly endemic area for *Metagonimus yokogawai*. However, there were no recent studies on the endemicity, in terms of prevalence and abundance, of *M. yokogawai* in a small-scale epidemiological survey of the river basin in order to determine the current status. In this study, 100 samples were collected and examined using sedimentation techniques. The egg prevalence of *M. yokogawai* was 37.5%, followed by the prevalence of flukes of *M. yokogawai*, 6 egg positive persons (6 egg positive person) and 1 person (1 person) of *M. yokogawai* were found.

Association of cholesterol granuloma and aspergill

[Kang H, Kim JK, Kim Y.](#)

Department of Radiology, Seoul Veterans Hospital, Seoul

Cholesterol granuloma (CG) is usually associated with a fungal infection. However, in this paper, we report a case of cholesterol granuloma associated with aspergilloma in a 78-year-old male patient with pain, headache and toothache. CT revealed the presence of the sphenoid sinus that showed a high signal intensity. This mass was later determined to be CG. The suspicion of aspergilloma of the paranasal sinuses are similar, and ventilation of the paranasal sinuses are considered important diseases. Overall, the results of this study indicate the importance of differentiating CG from other paranasal sinus masses.

Author(s) : Hye Sun Hwang; Won Jae Lee; Hyo K. Lim; Ho-Kyung Chun

Author Address : Department of Radiology and Center of Imaging Science, School of Medicine, Seoul 135-710, Korea

Keyword(s) : Chondrolipoma; Lipoma; Fatty tumor

Abstract : A chondrolipoma is an extremely rare form of fatty tissue. Chondrolipomas may be found in almost any part of the body, particularly in the connective tissue of the breast, head and neck area, as well as in the skeletal muscle. However, to the best of our knowledge, no chondrolipomas located in the pelvic cavity have not been reported. In this article, we report a case of a chondrolipoma in the pelvis, and show that it has its own characteristic in its composition of fatty tissue and calcification in most parts, as well as soft tissue components based on the CT and MR findings.
